FARMING ADVISORIES

Department of Science and Technology (<https://bagong.pagasa.dost.gov.ph/astronomy#philippine-standard-time>)
Philippine Atmospheric, Geophysical and Astronomical Services Administration (<https://pagasa.dost.gov.ph/flood>)

Philippine Standard Time
07:57:55 PM
14 September 2026

- Adjust planting, spraying, and harvesting schedules based on expected rainfall.
- Ensure proper field drainage to prevent waterlogging and root rot.
- Store harvested crops and farm inputs in elevated, dry, and covered areas.
- Apply mulch to reduce soil erosion and maintain soil moisture balance.
- Conduct regular field inspections for lodging, stem rot, and nutrient deficiencies.
- Remove and destroy infected plant parts to limit disease spread.
- Apply pest and disease control measures during dry windows.
- Stay alert and informed! Always follow the latest weather advisories from local authorities and your local government. Keep updated through the official DOST-PAGASA website, social media accounts, and PANaHON App for timely weather information, warnings, and safety updates.

ENSO ALERT SYSTEM STATUS

(Updated as of 07 September 2026)
EL NIÑO
<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf>
(<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf>)

Moderate to strong El Niño is present in the Tropical Pacific. Climate models predict that El Niño will continue until the first half of 2027 and may reach a very strong state before the end of 2026.

Farmers are advised to conserve water, maintain irrigation systems, and harvest rainwater to ensure adequate water supply during El Niño. Use drought-tolerant crops and soil moisture conservation practices. Regularly monitor DOST-PAGASA weather updates and adjust farm activities accordingly. Despite generally drier conditions, localized thunderstorms may still bring heavy rain, strong winds, lightning, and possible flash flooding.

FISHING ADVISORIES

Department of Science and Technology (https://bagong.pagasa.dost.gov.ph/astronomy#philippine-standard-time)

Philippine Atmospheric, Geophysical and

Astronomical Services Administration

Slight to moderate seas will be experienced over **the whole archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST- PAGASA.

ADDITIONAL INFORMATION

DAILY EXTREMES

Maximum Temperature 38.0 °C (Surigao City, 1983,1988)
Minimum Temperature 14.6 °C (Baguio City, 1990)
Rainfall 374.3 mm (Dagupan City, 2014)

MONTHLY EXTREMES

Maximum Temperature 38.9 °C (Tuguegarao, 1963)
Minimum Temperature 12.6 °C (Baguio City, 1990)
Rainfall 799.8 mm (Baguio City, 1911)
