

Monthly Philippine Agroclimatic Review and Outlook

ISSUE NO. 8

Agroclimatic Review for August 2026

For the month of August, the country was affected by several weather systems, including the tropical cyclones, Southwest Monsoon, low pressure area (LPAs), and localized thunderstorms.

Five tropical cyclones (TCs) enter and developed in the Philippine Area of Responsibility (PAR), namely: Tropical Depression (TD) Luis (August 1–3), Tropical Storm (TS) Maymay (Kujira) (August 4–7), TD Neneng (August 18–20), Typhoon (TY) Obet (Saudel) (August 24), and TS Pilandok (Krovanh) (August 30–September 3). These TCs enhanced the Southwest Monsoon (SW Monsoon), bringing episodes of heavy rainfall that triggered flooding and rain-induced landslides, particularly in western and Central Luzon and parts of Western Visayas. According to the National Disaster Risk Reduction and Management Council (NDRRMC) Situational Report No. 30, issued on September 1, 2026, the combined effects of the Enhanced Southwest Monsoon and TCs Luis, Maymay, and Neneng primarily affected Region I, the Cordillera Administrative Region (CAR), Region III, CALABARZON, MIMAROPA, and Region VI, resulting in widespread agricultural damage amounting to more than PHP 2.2 billion and infrastructure damage exceeding PHP 6.3 billion

As shown in Figure 1, above-normal rainfall conditions were experienced over most areas of Luzon except Bicol, Region, and most of Western Visayas, while below to way below normal rainfall conditions were observed over the remaining parts of the country.

The highest recorded rainfall for August was observed at **BSU La Trinidad Benguet Agromet Station** (383.9 mm), followed by **Laoag City Station** (263.2 mm), and **Subic Bay Station** (250.1 mm).

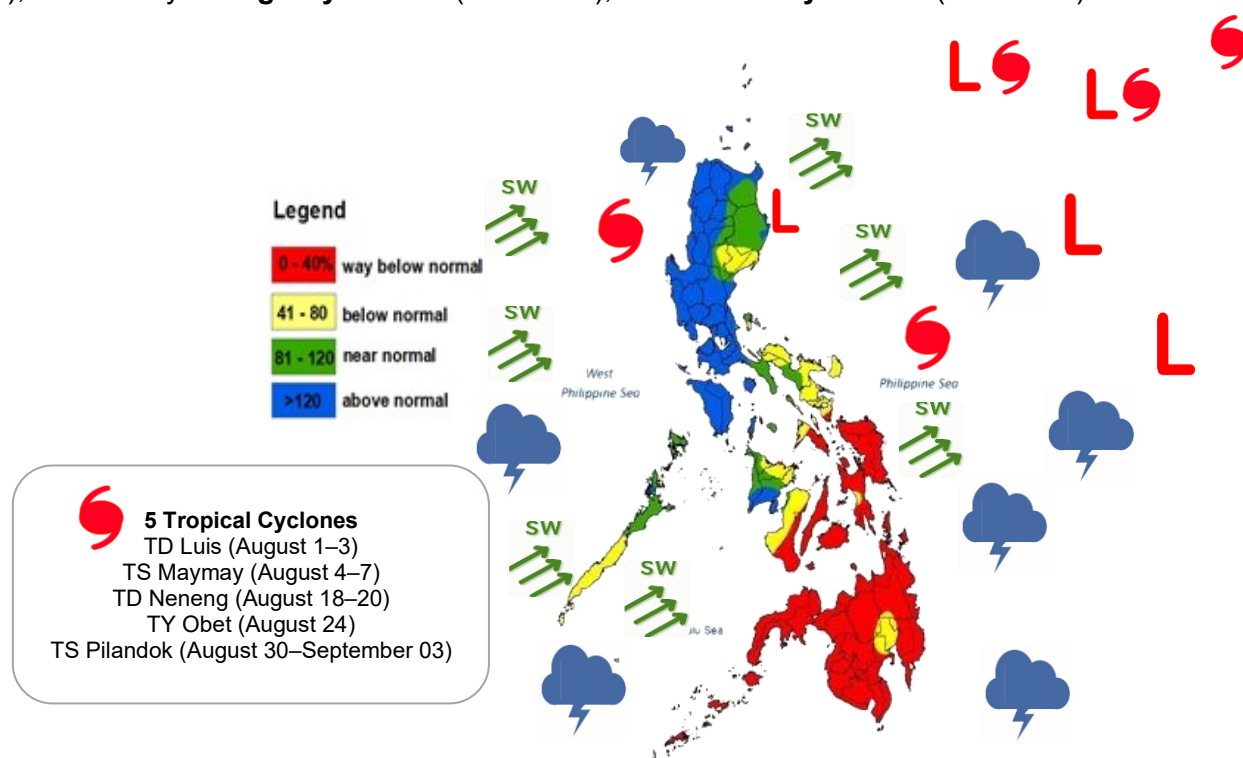

Figure 1: Actual Rainfall and weather systems experienced for August 2026

"tracking the sky...helping the country"

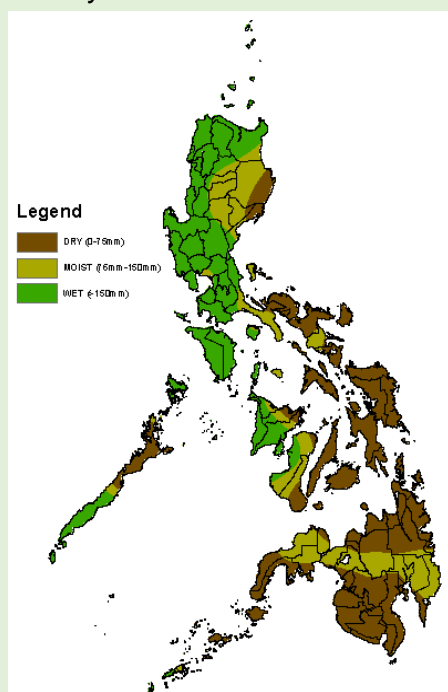

SOIL MOISTURE CONDITION

Wet – Ilocos Region, extreme Northern Luzon, Aparri, Cordillera Administrative Region, most of Central Luzon, National Capital Region, most areas of CALABARZON, and most areas of MIMAROPA, and Iloilo

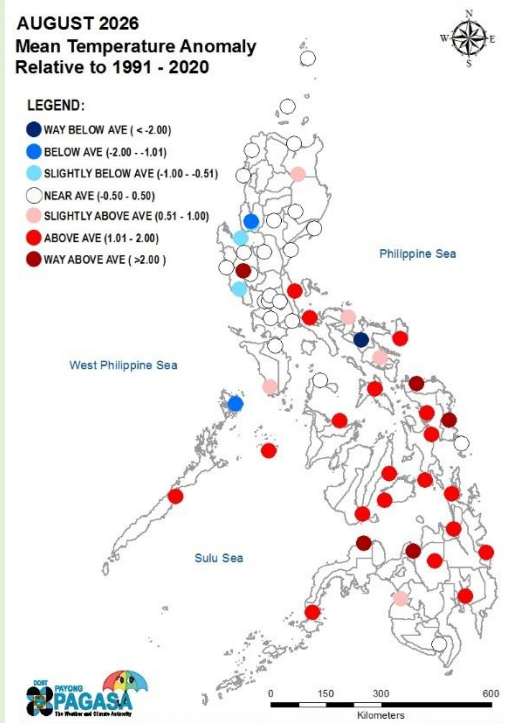

Moist – Tuguegarao, Isabela, Nueva Viscaya, Bataan, Mulanay, Pag-asa Island, Aborlan, Zamboanga del Norte, Davao del Sur, and Lanao del Sur

Dry – Casiguran, Alabat Puerto Princesa, and the rest of the country

TEMPERATURE

- Slightly above to above-average mean surface air temperatures were observed across most parts of the country, with some areas in La Union, Pangasinan, Zambales, Northern Palawan, and Camarines Sur recorded cooler than average temperatures.
- Borongan and Hinatuan** recorded the highest temperature with 37.5°C on August 22 and August 09, respectively. **Baguio City** logged the lowest temperature of 15.8°C on August 08.

FARM OPERATIONS

- Weed Management
- Pest and diseases management
- Fertilizer application
- Water Management
- Post-Harvest
- Cleaning and Maintenance

The agricultural technicians, farmers, and farm enthusiasts may continue to browse some tips and additional knowledge on potential crop production, early warning for pest and disease infestations and water management strategies for specific areas by visiting the website of Department of Agriculture in their respective regions. For daily farm weather and climate conditions, you may visit PAGASA website (<https://pagasa.dost.gov.ph/>)

CROP STAGES	REGION/CROPS
Land and Seedbed Preparation <i>(including preparation for garden plot, urban gardening, and upland farms), (irrigated and rainfed farms)</i>	▪ Rice – Ilocos Region, Central Luzon, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Northern Mindanao, Davao Region, SOCCSKSARGEN, and Caraga, ▪ Corn – Ilocos Region, MIMAROPA, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Davao Region, SOCCSKSARGEN, Caraga and BARMM
Planting and Transplanting <i>(broadcasting / direct seeding – for rice, corn, conventional way/ by rows - other cash crops)</i>	▪ Rice – Ilocos Region, Cagayan Valley, Cordillera Administrative Region, Central Luzon, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Central Visayas, Zamboanga Peninsula, SOCCSKSARGEN, Caraga, and BARMM ▪ Corn – Cagayan Valley, Cordillera Administrative Region, Central Luzon, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Northern Mindanao, Davao Region, SOCCSKSARGEN, Caraga and BARMM ▪ High Value Crops – All Regions
Vegetative Stage <i>(tillering, head development)</i>	▪ Rice – Ilocos Region, Cagayan Valley, Cordillera Administrative Region, Central Luzon, MIMAROPA, Bicol Region, Western Visayas, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Northern Mindanao, SOCCSKSARGEN, Caraga, and BARMM ▪ Corn – Cagayan Valley, Cordillera Administrative Region, Central Luzon, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Eastern Visayas, Northern Mindanao, Davao Region, SOCCSKSARGEN, Caraga, and BARMM ▪ High Value Crops – All Regions
Reproductive Stage <i>(Heading – rice; Tasselling/Silking – corn)</i>	▪ Rice – Ilocos Region, Cagayan Valley, Cordillera Administrative Region, Central Luzon, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Central Visayas, Eastern Visayas, Davao Region, SOCCSKSARGEN, Caraga, and BARMM ▪ Corn – Cagayan Valley, Cordillera Administrative Region, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Eastern Visayas, SOCCSKSARGEN, and Caraga
Maturing/Ripening	▪ Rice – Cagayan Valley, Cordillera Administrative Region, Central Luzon, CALABARZON, MIMAROPA, Bicol Region, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Northern Mindanao, Davao Region, SOCCSKSARGEN, Caraga, and BARMM ▪ Corn – Ilocos Region, CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Northern Mindanao, Davao Region, SOCCSKSARGEN, and Caraga

Harvesting Stage

- Rice – CALABARZON, MIMAROPA, Bicol Region, Western Visayas, Central Visayas, Eastern Visayas, Northern Mindanao, Davao Region, SOCCSKSARGEN, Caraga, and BARMM
- Corn – Ilocos Region, CALABARZON, Bicol Region, Western Visayas, Central Visayas, Eastern Visayas, Zamboanga Peninsula, Northern Mindanao, Davao Region, SOCCSKSARGEN, and BARMM
- High Value Crops – All Regions

Agroclimatic Outlook for September 2026

- The weather systems that will affect the country in September are the southwest monsoon, easterlies, ridge of the high-pressure area (HPA), intertropical convergence zone (ITCZ), low-pressure areas (LPAs), tropical cyclones, and localized thunderstorms.
- Two to three (2 to 3) tropical cyclones (TC) may enter or develop within the Philippine Area of Responsibility (PAR).
- As illustrated in Figure 2, below-normal rainfall condition will be experienced in most parts of Northern Luzon, Zambales, Bataan, Davao del Sur, Davao Occidental, and Sarangani, while near-normal conditions are expected over the rest of the country.

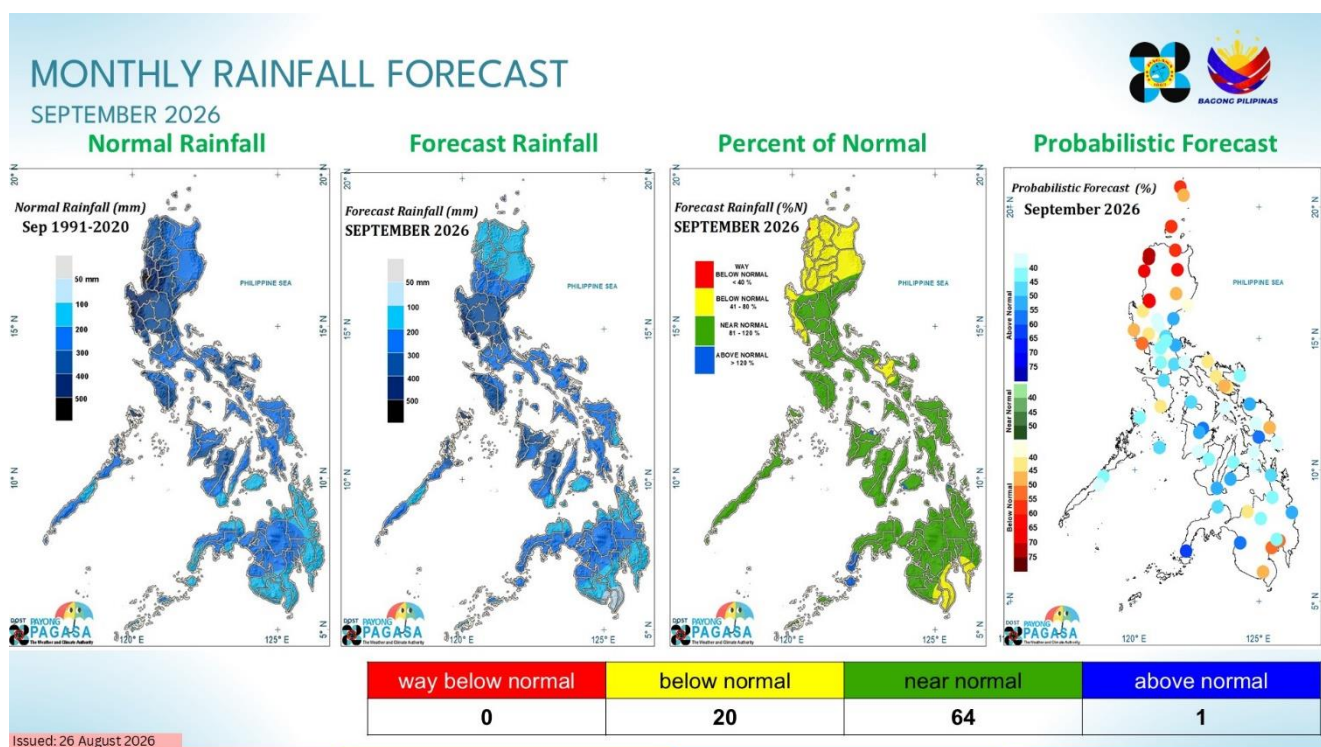

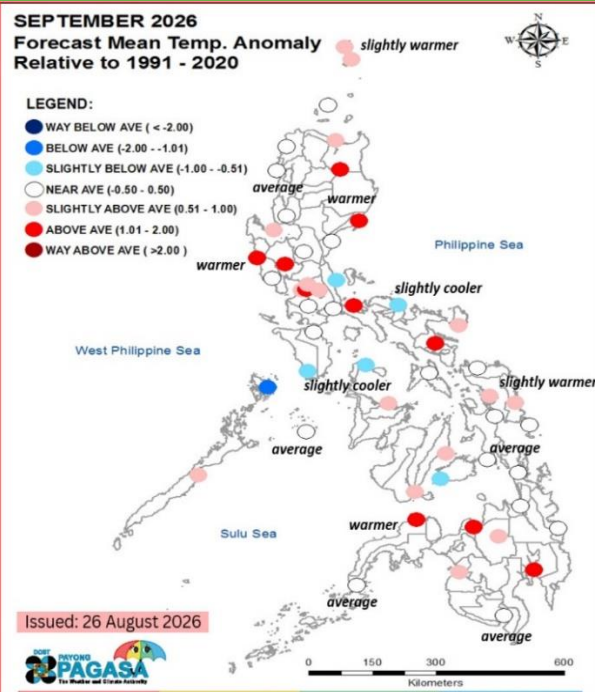

Figure 2: Monthly Rainfall Forecast for September 2026

Forecast Mean Temperature Anomaly

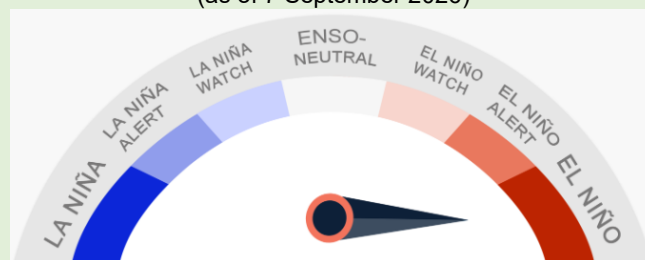

Near-average to warmer-than-average mean temperatures are expected across most parts of the country, except in some areas of Southern Luzon and Bohol, where slightly cooler-than-average conditions are anticipated.

ENSO ALERT SYSTEM STATUS

EL NIÑO ADVISORY

(as of 7 September 2026)

<https://www.pagasa.dost.gov.ph/climate/climate-advisories>

Moderate to strong El Niño is present in the tropical Pacific. Forecasts indicate that El Niño will continue until the first half of 2027 and may reach a very strong state in the coming months before peaking towards the end of 2026.

El Niño increases the likelihood of below-normal rainfall, which may lead to adverse climate impacts, including dry spells and droughts in some areas of the country. However, over the western part of the country, above-normal rainfall conditions during the Southwest monsoon season (i.e., Habagat) may also occur.

Extreme Temperature Range

	Luzon • Upland: 14.1 °C – 27.0°C • Lowland: 20.9 °C – 37.2°C
	Visayas • Lowland: 20.4 °C – 36.2 °C
	Mindanao • Upland: 15.4 °C – 33.6 °C • Lowland: 20.6 °C – 37.9 °C

PAGASA will continue to closely monitor the climate conditions that may affect the country and updates shall be issued as appropriate. For further information, please contact the Climatology and Agrometeorology Division (CAD) at telephone number 8284-0800, local 4915 or 4916.
